#### FACULTY

David Marcozzi, MD, MHS-CL, FACEP

Professor

University of Maryland School of Medicine

COVID-19 Incident Commander

University of Maryland Medical System

Senior Medical Advisor to the Governor on COVID-19

#### PRESENTATION

An Academic Health System Approach to the COVID-19 Threat

#### DESCRIPTION

As a result of the COVID-19 pandemic, the University of Maryland Medical System and the University of Maryland, Baltimore united to jointly address challenges and find optimal solutions to the pandemic. This presentation will describe the organization, process, and outcomes of that effort to date.

#### OBJECTIVES & OUTCOMES

- A better understanding of the rationale and approach taken to respond to the COVID-19 response for an academic health system.
- The appreciation of past, present, and potential future healthcare challenges in a pandemic response within a multihospital system.
- Describe the organization of the UMB-UMMS COVID-19 response.
- Define the processes required to coordinate and synchronize response efforts across UMMS hospitals and UMB.
- Chronologically explain challenges encountered through the response and the solutions implemented.
